

## **REMARKS**

### **Election/Restrictions**

In the Office Action of March 7, 2008 (hereinafter, "Office Action"), restriction to one of the following inventions is required under 35 U.S.C. 121, according to the Examiner:

- I. Claims 1 – 5 and 15 – 23 are drawn to a device with lenses to detect energy from a source, classified in class 250, and subclass 208.1.
- II. Claims 6 – 10 are drawn to a method for forming lens array substrate with plurality of channels, classified in class 250 and subclass 216.
- III. Claims 11 – 12 and 13 – 14 are drawn to a method with depositing a film on a substrate and depositing a plurality of masks over the film, classified in class 438 and subclass 758.
- IV. Claims 24 – 27 are drawn to a system comprising a light source with a self-aligned micro-lens to receive light, classified in class 250 and subclass 203.2.

The Office Action alleges that inventions I, II, III, and IV are distinct, and thus require restriction to one of the elected categories.

Applicants respectfully elect invention I, comprising claims 1 – 5 and 15 – 23, without traverse.

Please note also that a minor change to the specification is made in the Specification Amendments section at the end of this document. No new matter is added with this specification amendment.

Finally, please note that changes have been made to the first page of the drawings, in both Figure 1 and in Figure 2. A marked up drawing page and a clean copy of the drawings, marked "Replacement Drawing", are also included at the end of this document.

These drawing changes are made to be consistent with the description in the specification. In Figure 1, light rays 20B do not enter the channel 18 while light rays 20A do enter the channel. In Figure 2, light rays 40C, although bent by the lens 68, do not enter the channel 18, in contrast to light rays 40B, also bent by the lens, which do enter the channel, and also in contrast to light rays 40A, which would enter the channel whether the lens is present or not. No new matter is added with these drawing amendments.

### **Conclusion**

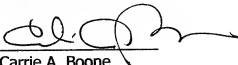

Applicants respectfully request entry of the specification amendment and the drawing amendments, and allowance of the elected claims 1 – 5 and 15 – 23.

Please associate this file with our customer number **32509**.

Respectfully Submitted,
